Experience Summary

- Working as Lead engineer development in Fidelity Information services (FIS)
- Worked as Tandem Developer and BAU Production Support for CONNEX switch running in TANDEM systems for Firstdata/Fiserv client in Cognizant
- Worked as Onsite Coordinator in Shanghai, China for FirstData,China client and as BAU support role in onshore to monitor, support and fix all P1 P2 P3 PROD Issues immediately and to develop project enhancements for other clients
- Good exposure in transaction processing on HP Non-Stop Tandem Platform.
- Good communication, grasping skills and eagerness towards learning new things. And Focused, self-motivated, detail-oriented.
- Acknowledged with MVP and Above Beyond award for 2022 in FIS
- Appreciated with Kudos award for the hardwork and dedication contributed for Q1,2020 in FIS
- Acknowledged with Star performer award in Academics.
- Implementing my innovative ideas, analytical skills, functional knowledge and creativity for accomplishing the projects and deliver the project on time.
- Ability to quickly become proficient in new subjects/techniques and immediate solution provider.
- I have certified as Oracle Certified Professional, Java SE 6 Programmer and Cognizant Certified Professional (CCP) in Banking and Financial services (BFS) Level 0.

Technical Skills

Hardware/Platform	Tandem
Operating System	Windows, NS
Switch	CONNEX,Tandem
Programming Languages	C, C++, TAL ,TACL
Databases	MySQL, Oracle10g , Enscribe
Tools and Utilities	FUP,Pathcom, ENFORM, DDL,Logscan,Auditscan,.CMSutil,LTADutil,CTLutil etc.
Domains	Banking and Financial Services, Cards and Payments

Academic Qualifications

Graduation	Bachelor of Engineering in Computer Science and Engineering- 2015 passed out with an aggregate of 8.175 CGPA
------------	--

Academy Training Details

Organization: Cognizant Technology Solutions

Eric Nathaniel Thomson
+91-9840683427
Eric161193@yahoo.in

Title	Customized C++
Description	Undergone training in C, C++,MySQL and Oracle 10g
Duration	June 2015 – Nov 2015
Environment	Microsoft Visual Studio (C++) MySQL Workbench 5.2
Designation	Programmer Analyst Trainee

Professional Project Experience

Project 1:

Organization: Fidelity Information Services (FIS)

Client: US clients

Title	Connex Product Development
Description	<u>Role and Responsibility:</u> • Project requirement analysis - Analysis and preparation of Functional specification document (FSD) • Development - code development/ configuration changes ,peer-reviewing the code and preparation of Technical specification document(TSD) • Testing - includes preparation of Unit test script document (UTS) and testing the positive and negative scenarios for the transactions • Modules Worked on - PI,PMC and AP • Followed Scrum methodology • Worked on major projects like Visa mandates, Trusted MIID, RCACM, creating new utility called APSQLUPT, CED screen enhancements, few AP and PI enhancements and bug fixes
Duration	September 2019 – Till present
Environment	Tandem – Connex Advantage System
Designation	Lead Engineer Development

Projects Worked in FIS:

Title	Description
-------	-------------

Eric Nathaniel Thomson

+91-9840683427

Eric161193@yahoo.in

Trusted MID	Enhanced the product to bypass AP validations for Trusted merchants Involved in CED config changes, coding, Unit testing, Prepared FC document demonstrated demo to the stakeholders
APSQUTIL	Created new APSQLUPT to migrate the Old FI ID with New FI ID by giving input parameter as Single PAN or Given PAN range and it will update given New FI ID in all the APSQL tables in AP
Visa Spring Mandates 2021	Worked on code enhancements for Article 11.2.12 – to support AFT limits and Article 11.3.4 – Visa stop payment services
CED screen adding a new field	Introduced a new field in CEDIOPT screen like a Y/N flag to verify and pass DE22 value from pend for reversals and advices
Mastercard Mandates 2022	Worked on impact analysis and code development for Mandates.
Stateless Tokenization Project	As part of Tokenization project, APO online server, APBATCH2, FHM and Falcon Demographic Servers were enhanced to support Stateless Tokenization/Detokenization of Pan , Account Number and Expiry Date/Prev Expiry Date in the CardHolder (CH) file and APFraud file for online transactions and AP maintenance as applicable.

Project 2:

Organization: Cognizant Technology Solutions

Client: First Data, China

Title	First Data China Connex
Description	<u>Role and Responsibility:</u> • Project requirement analysis - Analysis and preparation of Functional specification document (FSD) • Development - code development/ configuration changes ,peer-reviewing the code and preparation of Technical specification document(TSD) • Testing - includes preparation of Unit test script document (UTS) and testing the positive and negative scenarios for the transactions • Implementation - includes iPlan preparation, preparation and readiness of production code and performing pre-implementation and implementation activities

Eric Nathaniel Thomson

+91-9840683427

Eric161193@yahoo.in

	• Production support - Analyzing modules to fix the issues quickly that are impacted in PROD environment • Modules Worked on - PI,PMC and AP • Simulators worked on - FINSIM,UPI,Mastercard,Visa • Worked on pre-implementation and implementation activities of CR movement
Clients	FIRST DATA
Duration	July – 2017 till present
Environment	Tandem – Connex
Designation	Programmer Analyst

Projects Worked in First data, China :

Title	Description
HKT17017- HKT mPOS	Setup the new link for ISO as \$QK02 to support mPOS transaction for HKT client Code development Modules –PI Involved in CED config changes ,testing, pre-implementation and implementation
PCL16011-PCL ApplePay	Develop Auditscan code changes and format the LTAD file to support Data elements for Visa tokenization Applepay Involved in code development, QA/Regression testing support, pre- implementation and implementation
HKT 8583 Pre-Top up Function	Develop code changes to support DE4 for Pre top-up Balance Inquiry transactions for HKT client. And configure CED changes to support this transaction Modules changed – MasterCard PI Involved in code development, unit testing, QA/Regression testing support, pre- implementation and implementation
PCL and HKT UPI	Develop a new interface for PI UPI as similar to CUP And to support all the overseas transactions related to UPI Modules changed –PI,PMC,AP Involved in code development, unit testing, QA/Regression testing support

Eric Nathaniel Thomson

+91-9840683427

Eric161193@yahoo.in

FE Credit-IR13630571	Code fix for FEC client wrong ARC value Modules changed – PMC Involved in code development ,pre- implementation and implementation
FE Credit-Samsung Pay Tokenization	Develop Code for FEC client to support Samsung pay for TAR,TER,TEN,AC Modules changed – PI,AP Involved in code development ,pre- implementation and implementation
Visa and MasterCard Compliance Q2,2018	Develop Code to support mandates for Visa and Master Card Compliance Modules changed – PI,AP,CED config Involved in code development ,pre- implementation and implementation
FEC-170055 ISO 8583 – Development	Develop Code to support new ISO interface for purchase and purchase reversal txns Modules changed – PI,AP,CED config Involved in code development ,pre- implementation and implementation

Project 3:

Organization: Cognizant Technology Solutions

Client: First Data, Australia

Title	First Data Australia Acquiring
Description	Worked on tandem migration for UATC and CERT environment (NS2302/NS2404 Tandem series) Analyzing modules to fix the issues. Developed highly robust and scalable standalone Macros and applications Modified existing software to correct errors, adapt to new hardware and improve performance Format and process various financial messages thrown between the Switch, Host and various other requirements Worked on PI and AP modules. And utilities such as Logscan, Auditscan, CMSutil, CTLutil etc. Worked on FINSIM simulator Worked on some PROD IR issues and made code

Eric Nathaniel Thomson

Eric161193@yahoo.in

	changes based on the various requirement
Clients	FIRST DATA
Duration	June – 2016 till June -2017
Environment	Tandem – Connex
Designation	Programmer Analyst

Projects Worked in First data, Australia :

Title	Description
Tandem Migration	Created standalone macros to check syncing of files in old and new system and to change the node reference in ALT,PART files
ARAB bank	Decommission of Arab Bank BIN in APPARAM
CMG Credit Union	CMG Credit Union - Name Change to Regional Australia Bank in APPARAM
Indue - Traditional CU Pay Wave Authorization Strategy Setup-	Changes to support Pay wave authorization transaction both online and offline for Traditional CU in APPARAM.
Dniester Credit Union	Fix to change the Account type for Dniester in APPARAM updated from “chk” to ”dda”
CITI-Certification of the Ingenico Devices IPP250/350 terminals	Code fix in TH to accept RC05 for “Do not Honor” transaction mapped with action code "100" instead of RC51
EMV-Customer Readiness Indue	Code fix in TH71FMT to populate correct data in “8A” tag for EMV related transactions in Hyosung ATM’s
EMV-Customer Readiness-ME Bank	Fix the code for PICIS acquirer in DE23 in order to put the card^seq^nbr value in token ctknChpfromDE23 correctly
Fast-track 2017	APPARAM change to support Database PIN validation for Dniester proprietary BIN
Indue QCCU ECU migration	APPARAM change to support ECU Transactions under QCCU Authorization setup
BCU Switch Migration to ASL	Card & PIN Macro changes to setup New CAF cardholder database for BCU BIN ATM FIT table change to support PIN change functionality for Cashcard ATMs for BCU APPARAM change to setup authorization strategy for

Eric Nathaniel Thomson

+91-9840683427

Eric161193@yahoo.in

	new BCU Institution ID
3DES Bilbo Key Change	Code development to support 3DES CEDEKEY changes in APCA2X,BLDSDEVand CEDSR003
3DES Compliance Card & PIN project	Code development in PIN* files to send the request to SDX and request for encrypted PIN Block. And code changes in SDX server files to add functionality to receive the tokens from the requester
oDCP - Cardtronics AMS	APPARAM change to setup PIN change transaction for Hume Bank
BCU - Switch Migration	Fix in APADUTI file to change old-institution ID to new-institution ID in APADAA database (APM) for selected BINS
